LIVE WEBINAR
AEC Collection Essentials: What's New in Revit 2022
April 14, 2021 @ 16:00 (4pm CET or 3pm UK)

UPCOMING WEBINAR

AEC Collection Essentials: What's New in Revit 2022

Autodesk is broadcasting the webinar **AEC Collection Essentials: What's New in Revit 2022** on **April 14, 2021 at 16:00 (4pm CET or 3pm UK)**. Discover how Revit 2022 improves BIM authoring and deliverable production with a full slate of new features and upgrades.

Revit 2022 offers many new features that will help architects and engineers be more effective and productive when designing and documenting projects. In this presentation, we highlight the scope and breadth of the upgrades, before digging into key areas of focus around interoperability, documentation efficiency, and delivering on user requests.

Join Autodesk's AEC technical experts in architecture, structures, and MEP to learn about:

- The many new features, including requests from the community, available in Revit 2022
- Enhanced interoperability, including working in Revit with FormIT Pro and McNeel's Rhino3D
- Additions to the scheduling and annotation toolsets that improve efficiency and flexibility for documentation
- Highlights for architecture, structures, and systems
- The case for upgrading now to Revit 2022

Can't attend live? Register anyway and we'll send you the recording after the webinar.

If you would like to promote this webinar via email, in your eNewsletters, through your websites and social media accounts and in your email signature lines, you can find an email template HERE on DAM.

SUGGESTED PROMOTION ACTIVITIES

- Direct email invite to your customers and prospects
- Banner ads on your website
- Promotion/article in an eNewsletter
- Email signature lines
- Listing on an "Upcoming events" page on your website
- Posts/blogs/tweets on social media
- Include it with pricing quotes and invoices

RESTRICTIONS

- The collection, processing and use of personal data must at all times be in compliance with applicable law including GDPR.
- Don't use the Autodesk name or logo to state or imply that the email is coming from Autodesk or that the webinar is being co-presented or co-sponsored with you.
- There can be no performance promise, product bundling or tie-ins in connection with webinar attendance as this is intended to be a free webinar.
